## Spring flushing of Township of Tiny municipal water systems delayed until April 27, 2026

**Date:** April 15, 2026

Municipal water users are advised that the Township of Tiny has delayed the start of spring flushing of municipal water mains to begin on April 27, 2026, instead of the previously scheduled start date of April 20, 2026. This schedule delays the beginning of municipal water system flushing by a full week to ensure water levels from recent precipitation, spring thaw and flooding conditions have subsided prior to the start of flushing. To view the 2026 water main flushing schedule, please visit our website at [www.tiny.ca/drinkingwater](http://www.tiny.ca/drinkingwater). Water flushing in the township takes place in the spring and fall annually. The required work will take place during the week, Monday to Friday, only between the hours of 8:00 a.m. and 4:30 p.m.

There may be potential water interruptions and discoloured water could stain laundry during these times. If your water remains discoloured or dirty, run the water until it is clear. It is recommended that water softeners are left in by-pass mode during water main flushing.

This is a vital process to ensure the distribution systems are in good working order for when they are needed most. The process will also remove any accumulated sediment that may be built up in the pipes and help ensure the cleanest water possible.

The Township of Tiny's water distribution system is a complex network of pipes and storage reservoirs where sediment or deposits may naturally accumulate over time. If not removed, these materials may cause water quality deterioration, taste and odour problems, or discolouration of the water.

To be notified when flushing is happening in your area, residents are encouraged to sign up for free notifications by app, email, text, or phone call through Tiny Connect at [www.tinyconnect.ca](http://www.tinyconnect.ca). Notice will be sent to affected residents in advance of the flushing in their area. Tiny Connect is the township's mass notification software that helps keep the community up to date on everything happening in Tiny.
