Re: 5 Proposed Lots at Sawlog Point
Sewage System Feasibility Review

Dear Maryann,

We have completed our review for the five proposed lots at Sawlog Point Road and Clearwater Crescent in the Township of Tiny. Specifically, we have reviewed the following:

1. Concept Plan prepared by MHBC Planning dated July 31, 2026.
2. Historical sewage system records in the area.

We also completed a site visit to assess the four test pits excavated by Township staff.

We have concluded that each of the five proposed lots are adequately sized to support new class 4 sewage systems.

We have copied Tim Leitch, Director of Public Works and Lee Bull, MHBC Planning so that they have a copy of this letter for their files.

We trust you will find this satisfactory.

Yours truly,

Tatham Engineering Limited

Bill Goodale, C.E.T.
Township of Tiny Sewage System Inspector
