À L'ÉCOLE

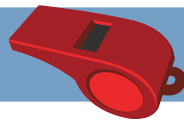

Visiting camp this
Wednesday, August 10th

Scientists in School is a leading science education charity that has reached over 10 million young scientists since founding in 1989. In a typical year, close to 400 highly-trained passionate presenters deliver 25,000 workshops. The majority have academic or professional backgrounds in STEM, and are diverse role models to young scientists they inspire annually.

Through their hands-on, inquiry based STEM classroom and community workshops, they strive to ignite scientific curiosity in children so that they question intelligently, learn through discovery, and connect scientific knowledge to their world.

Counselor Column

Last week we had more wild weather rain down on us, but that didn't stop the good times from pouring in! Mother Nature has thrown everything she has at us, except for snow of course. With that being said, I might start packing my snow pants... just in case.
