Highlight of the Week

Visiting camp this
Wednesday, August 18th

Music is a form of entertainment that puts sounds together in a way that people like or find interesting. Most music includes people singing with their voices or playing musical instruments, such as the piano, guitar, or drums. Even in the stone age people made music. The first music was made trying to imitate sounds and rhythms that occurred naturally. Most likely the first rhythm instruments involved the clapping of hands, stones hit together, or other things that are useful to keep a beat. Human music may echo these phenomena using patterns, repetition and tonality.

Learn to play, compose and record music through a wide variety of music lessons lessons on guitar, piano, fiddle and music production with the Schomberg Academy of Music!

Counselor Column

The end of the summer is near and that means it's almost time for our annual camper appreciation party! All of the counselors have been working hard to prepare a special show for the campers, and just wait until you see what kind of fashion taste we have at our lost and found fashion show. A movie under the stars will be the perfect way to end the night and celebrate another amazing summer!
